

Hello all,

SDG&E Powerlink is really about the future, and how we will manage both growth and quality of life.

"The web must include strands connecting the youth to the elders, native to non-native, local indigenous people to international native cultures, and to the world beyond."

--the meaning of the Tsilhqot'in word "Inteliluyini."

The wise and moral man
Shines like a flower on a hilltop,
Making money like a bee
Who does not hurt the flower
--The Pali Canon (500BC)

"Until we have a reasonable idea of where we want to go, we are unlikely to get there."

--David Korten, "The Post-Corporate World"

"The return from your work must be the satisfaction that work brings you and the world's need of that work. With this, life is heaven, or as near heaven as you can get."

--W.E.B. DuBois

and finally, a quote from a black civil rights leader,

"Like exercise strengthens the body, struggle strengthens the character."

--Ossie Davis.

Wishing you lots of wind on your wings,
